

What is Cascading?

To make winning millions easier for our customers, Magnum's 4D Jackpot game has this unique and innovative feature whereby the Jackpot 2 Prize, which is 10 times easier to win than Jackpot 1 Prize, could grow into a sum greater than RM10 million!

The following illustration explains how this unique Cascading features works.

In short, in any particular draw where Jackpot 1 Prize has surpassed RM30 million and there is still no winner, and during the same draw, there are one or more winners for Jackpot 2, the amount equivalent to **Jackpot 1 Prize minus RM20 million** will be **Cascaded** and **Added** to the Jackpot 2 Prize. The Jackpot 2 winners will therefore get to share a Jackpot 2 Prize greater than RM10 million! M-System Jackpot 2 winners are entitled to a partial share.

If there is a partial payout for Jackpot 2 when cascade is triggered, the remaining amount will snowball for the subsequent draw.
